2 CONTRACTOR

Company			
Licensed Contractor		License No.	

3 WHAT I AGREE TO

- 1. The truss package is due before the first inspection.** The truss design drawings for this project (roof and floor trusses, one design sheet per truss) are not included with my submission to Freedom Code Compliance Corp ("FCC"). I will submit them to FCC before I request the first inspection on this permit. FCC will not perform any inspection on this permit until it receives them.
- 2. It is reviewed as a revision.** FCC reviews the truss package against the approved plans as a revision to this project, billed at FCC's minimum revision fee.
- 3. The design professional checks it first.** If a Florida-registered engineer or architect prepared the plans, I will send the truss package to them first and include their note that it is in general conformance with the design of the building. (FBC-Building 107.3.4.1)
- 4. No trusses go up until the package is approved.** Trusses will not be installed until the truss package is approved, and the truss design drawings will be delivered to the job site with the trusses. (FBC-Residential R802.10.1; FBC-Building 2303.4.1.1)
- 5. Plan changes come with it.** If the truss package changes the approved plans (bearing points, girders, uplift connections, or loads), I will submit revised plans with it.
- 6. Building department steps still apply.** If the building department has its own deferral step for this permit, such as a deferral request on the permit record, I will complete it.

Under penalties of perjury, I declare that I have read the foregoing Truss Deferral Affidavit and that the facts stated in it are true.
